

JASPER AUGUSTIN

Chennai, India | +91-8870409051 | jaspershobana@gmail.com | Open to Relocation: UAE

PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years of experience in enterprise .NET/C# Full Stack Development, specializing in ASP.NET Core, Web API, React, Angular, and SQL Server. Proven track record designing and modernizing enterprise SaaS applications, including MVC-to-React migration, REST API integration, and Microservices architecture, with production CI/CD pipeline experience on Azure. Skilled in JWT/RBAC authentication and authorization, workflow automation and rule engine design, and SQL Server/LINQ performance optimization. Strong collaborator within Agile Scrum teams, with hands-on experience across Azure Blob Storage, Azure Cosmos DB, Key Vault, and Application Insights.

TECHNICAL SKILLS

Languages & Backend: C#, .NET Core 6/8, ASP.NET Core, ASP.NET MVC, Web API, Entity Framework Core, LINQ
Frontend: React, Angular, TypeScript, JavaScript, HTML5, CSS3, Bootstrap
Database: SQL Server, T-SQL, Stored Procedures, Query Optimization, Performance Tuning, Azure Cosmos DB
Architecture & APIs: Microservices Architecture, REST API Design & Integration, Enterprise Application Development, Application Modernization, Rule Engines, Workflow Automation
Cloud & DevOps: Azure Blob Storage, Azure Cosmos DB, Azure Key Vault, Application Insights, CI/CD Pipelines, SendGrid
Security: JWT, RBAC, IdentityServer, Authentication & Authorization
Tools & Practices: Git, Postman, Agile/Scrum, Code Reviews, Unit Testing, GitHub Copilot

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Softura | Chennai, India

Feb 2026 – Present

Project: MyKomatsu – KX Fleet Application | Domain: Industrial

- Designed and led the MVC-to-React modernization of the PLM, OEM, and Alert modules for an enterprise industrial fleet application, building solutions using the .NET framework and React with TypeScript.
- Designed and implemented reusable Multiselect Global Dropdown components integrated with external systems and APIs, extending consistent functionality across multiple application modules.
- Developed React-based UI components using TypeScript, HTML5, and CSS3, writing clean, scalable, and efficient code aligned with enterprise best practices.
- Collaborated with cross-functional teams in an Agile environment to gather and analyze requirements, conducted code reviews, and debugged applications for performance and usability.

Software Analyst | Agilysys | Chennai, India

Aug 2023 – Feb 2026

Projects: DataMagine & eForms | Domain: Enterprise SaaS Automation

- Designed and developed RESTful APIs using C# and ASP.NET Core 6/8 within a microservices-oriented architecture for enterprise document management systems.
- Built Angular UI modules with Reactive Forms for workflow management, approvals, and rule configuration, integrating applications with external systems and APIs.
- Implemented JWT authentication and RBAC security using IdentityServer to secure enterprise SaaS applications.
- Optimized SQL Server stored procedures and LINQ queries, improving API response time by 45%.
- Integrated Azure Blob Storage and SendGrid for document storage and automated notifications; contributed to CI/CD pipeline deployments.
- Developed a dynamic Rule Builder engine using Angular Reactive Forms with nested conditions and dynamic rule configuration, enabling flexible workflow automation; supported Agile ceremonies and UAT.

Software Engineer | Novac Technology Solutions | Chennai, India

Aug 2021 – Aug 2023

Project: Kazito POS Platform | Domain: Retail SaaS

- Developed billing, inventory, and customer management modules using C#, .NET Core, and SQL Server, writing clean and efficient code adhering to best practices.
- Built responsive, reusable UI components using React (TypeScript), HTML5, CSS3, and JavaScript with a modular frontend architecture.
- Improved API and database performance for high-volume POS transactions and supported debugging, UAT, and deployment activities.

SELECTED ACHIEVEMENTS

- Cut API response time by 45% by redesigning SQL Server stored procedures and optimizing LINQ queries, directly improving system responsiveness for end users.
- Led MVC-to-React modernization across two enterprise product lines (industrial fleet management and document automation SaaS), improving UI maintainability and consistency.
- Replaced manual, hard-coded workflow logic with a configurable Rule Engine (Angular Reactive Forms, nested conditions), reducing effort needed to adjust business rules.
- Strengthened enterprise SaaS security posture by implementing JWT/RBAC authentication via IdentityServer, enabling granular, role-based access control.
- Built reusable components (e.g., Multiselect Global Dropdown) adopted across multiple application modules, reducing duplicate front-end development effort.

EDUCATION

Bachelor of Technology in Information Technology

St. Joseph's College of Engineering, Chennai | 2016 – 2020

CERTIFICATIONS

Angular Framework Fundamentals – Coursera
